

An aerial photograph of a river flowing through a rocky, moss-covered landscape. The water is a vibrant green color. In the upper left, a single red kayak with a black paddler is visible. In the lower right, a larger yellow and blue inflatable raft with several people inside is navigating the river. The background consists of grey, textured rock formations with patches of green moss.

GUMOTEX

THE EXPERIENCE BEGINS
WITH A CHOICE

WE HAVE EVERYTHING UNDER CONTROL

We're the only company in the world that produces boats starting with the raw material itself. What comes into the factory are only textiles, raw rubber and additives. What leaves is a complete boat – tested several times and packaged. Everything takes place here, in Břeclav in the Czech Republic, in the EU. We obviously adhere to all fair employment and environmental protection policies.

WE HAVE SOMETHING FOR EVERYONE

Are you looking for a small light kayak for one, a family kayak or a large raft?
We've got it all – the choice is yours.
You're not sure?
Let us know, we'll be happy to help.

WE'LL TAKE YOUR PETS FOR A RIDE

Our materials have stood the test of dog paws and claws. Take your four-legged friends along for the ride – they're sure to enjoy it just as much as you!

ENOUGH ROOM FOR EVERYONE ON BOARD

Dear paddlers,
Have you ever been kicked in the back when sitting in a boat, or even gotten hit with a paddle? When designing our boats, we keep the necessary space for paddling and maneuvering in mind. You'll enjoy a comfortable ride with plenty of room.

WHEN THE BOAT'S ALL PACKED UP, IT'S EASY TO CARRY, IT FITS IN THE TRUNK OF YOUR CAR AND ON BOARD A PLANE

Most of our boats are delivered in a waterproof backpack that you can throw over your shoulder and set out for an adventure. Now, that's freedom.

When compared to PVC, our rubberized boats can be packed into smaller dimensions, which you're sure to appreciate since it won't get in the way and you'll save plenty of space.

NO WAY OF GOING UNDER

Our boats are made from highly durable materials. Each boat has at least 3 air chambers. If an accident does occur leading to the deflation of one of the air chambers, the two remaining chambers will keep you afloat. You're safe with us.

WE USE NATURAL RUBBER TO MAKE OUR BOATS – IT'S ECO-FRIENDLY AND EASY TO FIX

One of the fundamental materials used in the production of boats can be found between the bark and wood of the Para rubber tree. Thanks to the superb properties of natural and synthetic rubber blends, which we develop ourselves, our boats are extremely durable. The material is flexible, and doesn't succumb to breaks in folds even when stored for a longer period of time. In case there is a puncture, you'll easily be able to fix it with the repair kit supplied with all boats. You'll manage it easily and without breaking a sweat.

WE ARE AVAILABLE TO YOU

We know our boats to the very last thread – we control their production starting with the development of materials. We are able to secure spare parts for models that we no longer offer. Everything takes place under one roof with a great deal of handcraft. Our warranty and post-warranty service is available to you for the boat's entire lifespan. We're here for you.

ON THE WATER TOGETHER FOR ALMOST 70 YEARS

The long-term experience and know-how that we've been able to acquire over this time help us to produce unique inflatable boats. Our own in-house development allows us to experiment with new materials and search for new ways of improving the utility value of the boats. The cooperation with experts in the field as well as fellow paddlers keeps moving us forward. That's why you'll always get a wonderfully designed and tested boat from us.

See you out on the water!

THE SECRET TO OUR BOATS' STRENGTH

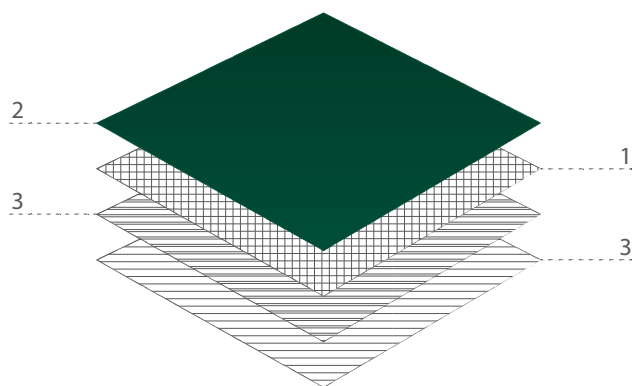

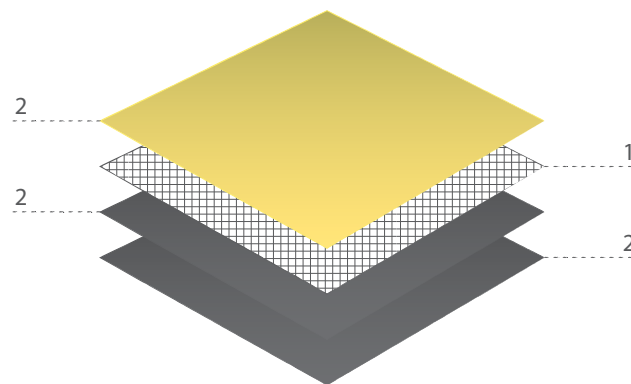

We make everything from the beginning and so we have developed our own fabric based on natural rubber which guarantees excellent boat durability. Our boats are resistant to abrasion, aging and sunlight.

DOUBLE-SIDED NITRILON®

Material composition: high-strength PES fabric (1) with a double-sided synthetic rubber coating (2). The material is highly resistant to abrasion, aging and UV light. Tensile strength min. 3 000/3 000 N (sample 20 × 5 cm).

Minimum weight 1 192 g/m².

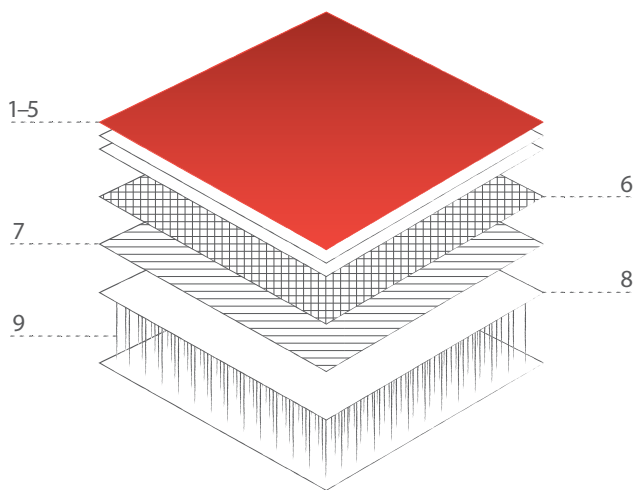

Models: K2 and PULSAR N.

NITRILON®

Material composition: high-strength PES fabric (1) with an outer synthetic rubber coating (2) and inner natural rubber blend coating (3). The material is highly resistant to abrasion, aging and UV light. Tensile strength min. 3 000/3 000 N (sample 20 × 5 cm).

Minimum weight 920 g/m²

NITRILON® + DROP-STITCH

Material composition: outer coating based on synthetic rubber (1), anchoring layer (2), high-strength PES cloth (1 100 dTex) (3), anchoring layer (4), natural and synthetic rubber coating (5), natural and synthetic rubber coating (6), anchoring layer (7), drop-stitch top sheet (9).

Minimum tensile strength is 3 600/3 100 N (20 × 5 cm sample). Minimum weight is 1 270 g/m².

Models: THAYA, RUSH and SEASHINE.

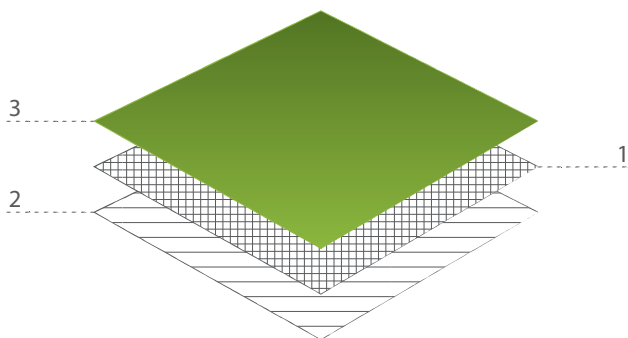

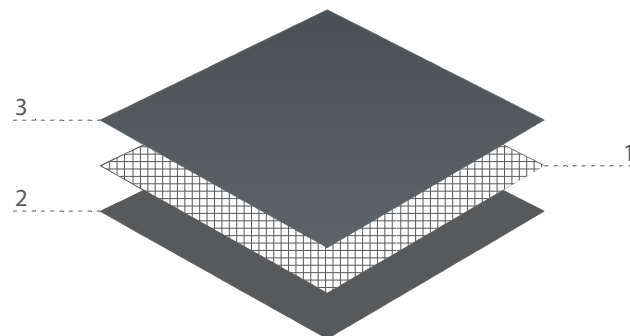

NITRILON® EXTRA

Material composition: high-strength PES fabric (1) with an inner and outer layer of synthetic rubber (2) coating and outside NITRILON® EXTRA (3) coating. A top quality material for maximum load and for use in demanding climatic conditions.

Tensile strength min. 3 000/3 000 N (sample 20 × 5 cm).

Minimum weight 1 487 g/m².

Top of the line rafts PULSAR NEX.

PES PUR

Material composition: PES fabric of RIPSTOP (1) type with an inner polyurethane layer (2) and Teflon water-repellent finish (3). The material is resistant to abrasion, aging and UV light. Minimum pull strength 1 100/900 N (sample 20 × 5 cm).

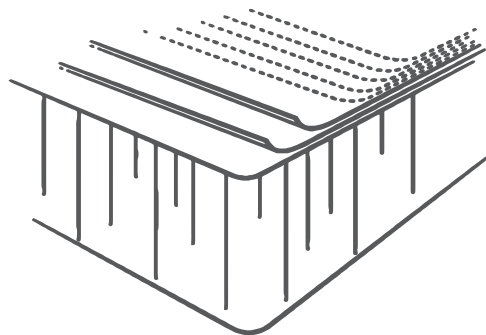

SMART FEATURES

SOLID BOTTOM USING DROP-STITCH TECHNOLOGY

The bottom of the boat is reinforced by thousands of fibers connecting its inner walls. Thanks to this feature the boat is very stable and difficult to capsize.

Featured on THAYA, SEASHINE and RUSH kayaks.

drop-stitch material

TRACKING FIN HELPS TO STEER COURSE

The tracking fin makes it much easier to control the kayaks. Ensuring the boat tracks well and maintains good directional stability.

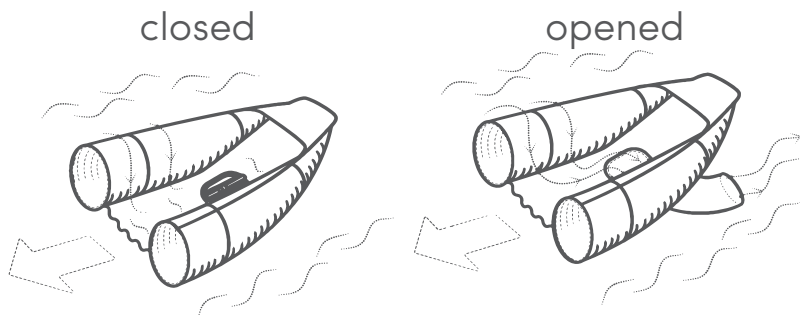

Featured on THAYA, RUSH, TWIST, SEASHINE, SWING, SOLAR, FRAMURA, SEAWAVE, SAFARI 330 and HALIBUT kayaks.

SELF-BAILING BOTTOM WITH A ROLL-TOP SEAL

Got water on deck? Thanks to the self-bailing floor design, water will drain away without effort. The rolling closure allows the floor to be sealed for calm water use.

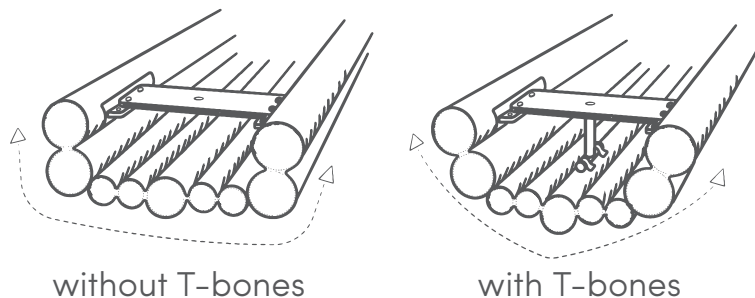

Featured on BARAKA and SCOUT boats.

T-BONE REINFORCEMENTS

Metal reinforcements placed under the seats serve to shape and reinforce the bottom of the boat. Actually, the inflatable boat gains the performance characteristics of a hard-shell canoe.

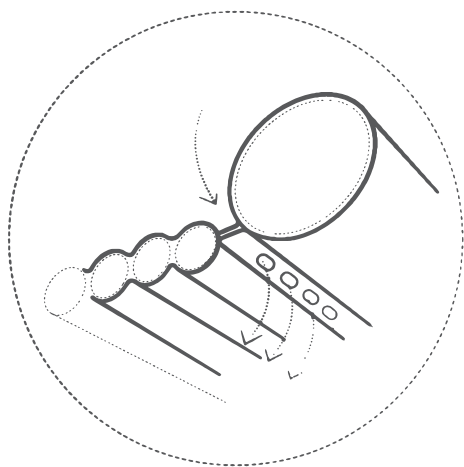

Featured on SCOUT canoe.

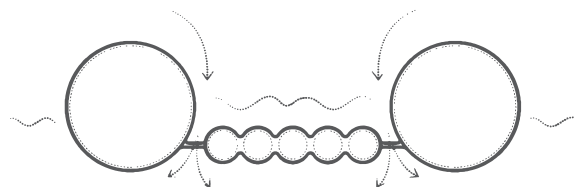

SELF-BAILING BOTTOM WITH DRAINAGE HOLES

Unobtrusive holes in the bottom of the boat will ensure you stay dry through more ferocious rapids with water draining immediately.

Featured on SAFARI 330, K2, ONTARIO 450S and PULSAR boats.

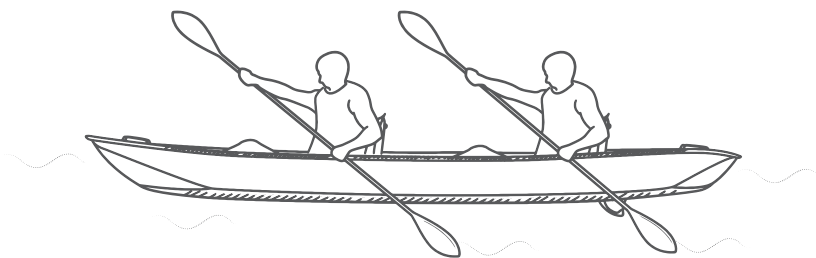

self-draining holes

COMFORT ABOVE ALL ELSE

Even if you attach a third seat to your SEAWAVE, SOLAR or THAYA kayaks, each paddler will still have plenty of room and comfort. We respect the rules, and so all our boats comply with legal standards. As for boat capacity, we often supercede the standards.

BOATS FOR EVERY OCCASION

Inflatable kayaks are stable, safe, easy to use and easy to pack. Recreational kayaks are designed for paddling on calm water such as lakes or coastal estuaries. White-water kayaks are designed for experienced paddlers for river descents with a higher degree of difficulty.

KAYAK WITH UNIQUE PROGRESSIVE HULL

The **SEASHINE** is an inflatable kayak designed and adapted for navigation on the seas, and for paddling long distances on lakes, estuaries or large rivers. It provides plenty of space for 2 paddlers and their baggage for multi-day trips. It can be equipped with single or double cockpit and steering rudder.

There are several important innovations that offer the paddler new performance in terms of glide and speed in calm water, while retaining a shape that is essential for navigation in rough seas - like the other touring kayak models Seawave and Rush.

Rush

drop-stitch bottom

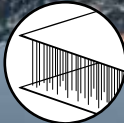

An innovative and versatile kayak design which further expands the possibilities of **drop-stitch** technology (hydrodynamically designed bow and keel). The **RUSH** is suitable for recreation, touring, calm lakes, coastal waters as well as navigating white water up to grade 2. For better comfort in poor weather conditions, it can be equipped with a rudder or a removable cockpit (recommended accessories). The main advantages are versatility, speed and stability.

The **RUSH 2** kayak can be used as a single or as a double kayak.

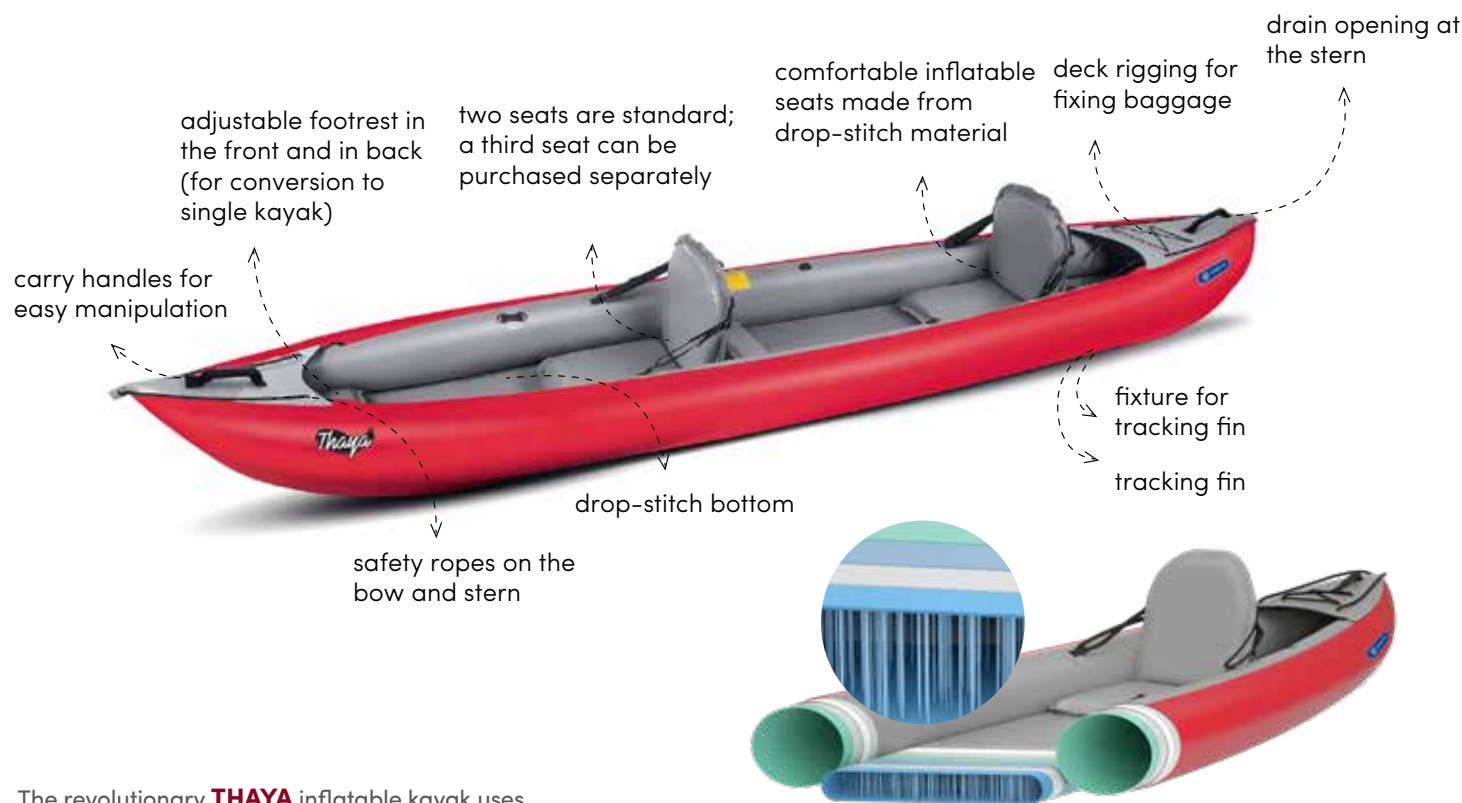

Drop-stitch technology is based on the connecting the upper and lower layers of the fabric with thousands of polyester fibers. This fabric, equipped with an airtight coating, is protected from both sides by a resistant **NITRILON®** material.

Thanks to the thousands of fibers holding both layers together, these products can be inflated up to very high pressure. It enables the material to obtain robustness approaching the robustness of solid materials.

Thaya

A KAYAK WITH AN INFLATABLE, SOLID BOTTOM

The revolutionary **THAYA** inflatable kayak uses a combination of our special **NITRILON®** material with **drop-stitch** technology and is defined by its excellent stability, stiffness and maneuverability. The unique combination of the inflatable side tubes and modern **drop-stitch** technology creates an universal combination which maximizes the user's comfort and improves the handling properties of the boat. Light-weight and easy to pack away: the added benefits of the **THAYA**.

It is suitable for recreational paddling on lakes, gentle coastal waters and rivers up to grade 2. Seating positions can be adjusted for 1, 2 adults or 2 adults + 1 child. An optional foredeck splash cover offers protection for the front paddler and prevents water from flowing over the bow.

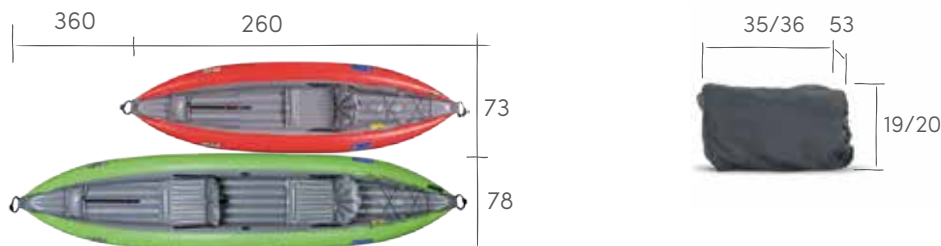

TWIST

TWIST 2/1
TWIST 1

A LIGHTWEIGHT KAYAK FOR EVERYONE

Are you looking for a small, lightweight, space-saving kayak as a companion on the road and your watersport adventures? Then the **TWIST** is the right choice for you, whether you're exploring new places on lakes or travelling on calm rivers. The **TWIST 1** is the smallest and the lightest kayak from our

fleet. The **TWIST 2/1** can be easily transformed from its two-seat version to its one-seat version or vice versa, thanks to an innovative design. The kayak is stable enough for a variety of paddler sizes, and comfortably fits two people.

SWING

SWING 2 SWING 1

A STABLE PARTNER FOR TRICKY SITUATIONS

The inflatable kayak **SWING** is an excellent choice for recreational trips and active leisure on calm waters (like lakes and sea bays), and flowing rivers up to grade WW2.

The kayak has undergone significant improvements to enhance its comfort, safety, and durability. New black seats can be easily replaced with other seat models from our range, such as the universal DS seats, Seashine, Seawave, etc...

Both the bow and stern are equipped with robust tubular handles for easier handling on top. Addition of safety ropes provides increased safety. The deck now features waterproof zippers on the bow and stern to prevent water from coming through.

The footrest attachment has been updated to a two-point system, ensuring better foot support.

A draining hole has been added to the top of the stern to allow for easy water outpour after the paddling session.

With its internal reinforcement system, the kayak offers sufficient rigidity, ensuring easy handling and excellent stability. Its lightweight design makes it easy to carry, and the enclosed cockpit protects both the paddler and his gear from water. The **SWING** is available in both single and double versions, making it ideal for trips requiring frequent portages and maximum comfort on the water.

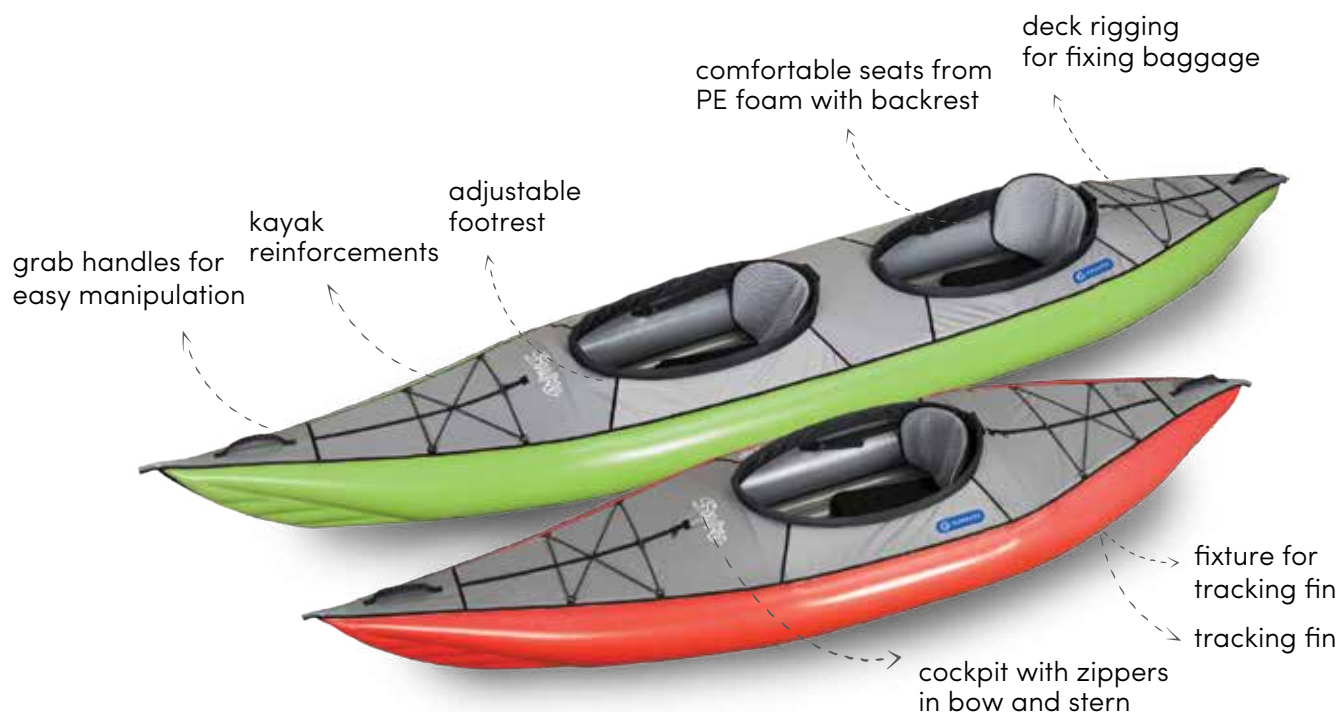

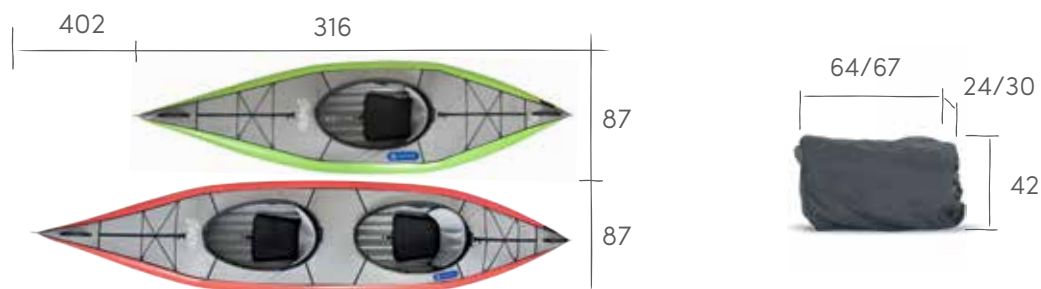

SWING

SWING 2 SWING 1

A STABLE PARTNER FOR TRICKY SITUATIONS

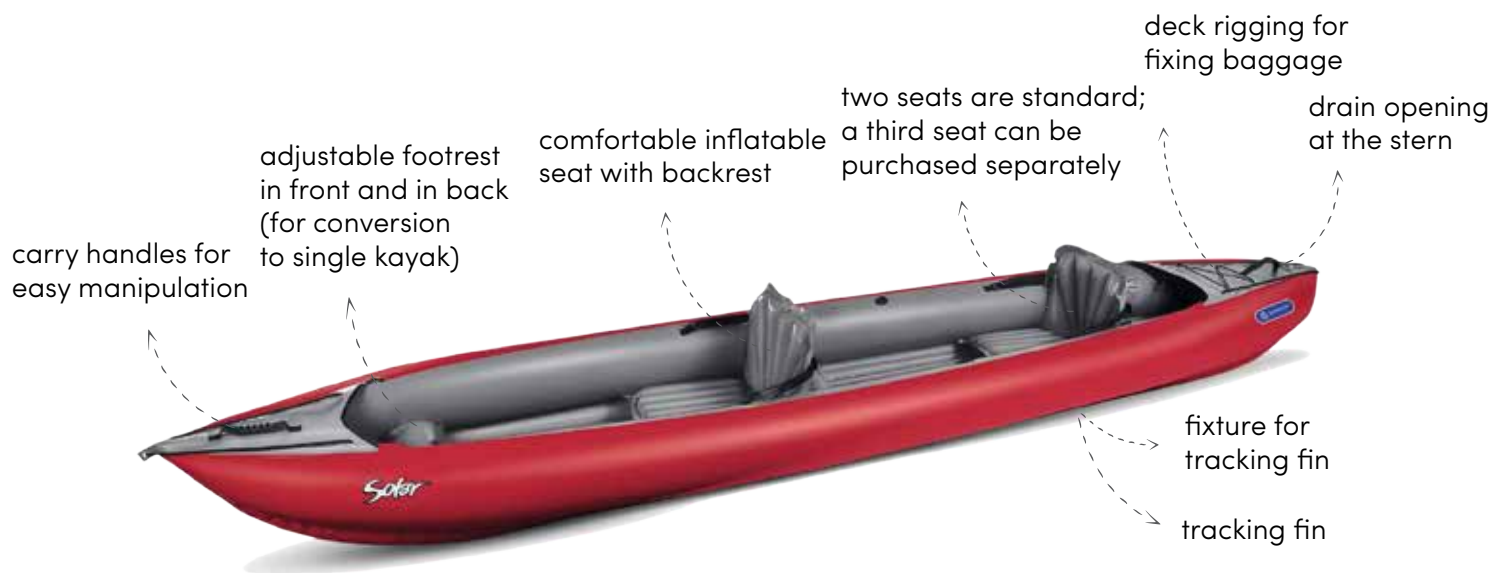

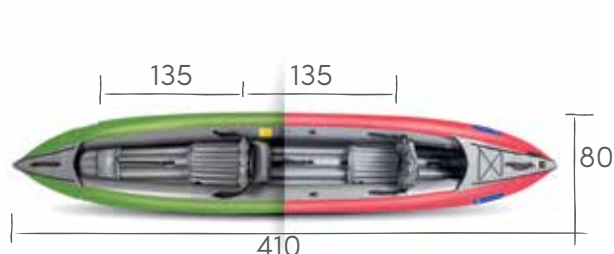

The **SWING** is a sit-in inflatable kayak great for relaxing trips on sheltered waters, harbours, lakes and rivers up to grade 2. The kayak is supplied with two aluminium reinforcements for improved rigidity of the hull, maneuverability and stability.

The reinforcements also shape the deck of the kayak. Thanks to its low weight, the kayak is perfect for trips with frequent portages. The kayak is available in a single and a double version.

Solar

A FAMILY KAYAK THAT ALMOST PADDLES ITSELF

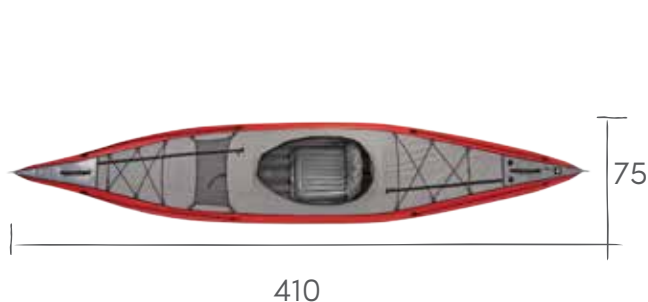

The **SOLAR** inflatable kayak serves for both trips on lakes and touring on rivers up to grade 2. An optional foredeck splash cover offers protection from the elements for the front paddler and prevents water from flowing over the bow. The kayak is equipped with a drainage hole in the rear deck.

The **SOLAR** is equipped with two seats and fixtures for an optional third seat. As a result, the **SOLAR** boasts versatility with paddling setups for solo, tandem or 2+1 use.

Framura

THE FASTEST GUMOTEX KAYAK

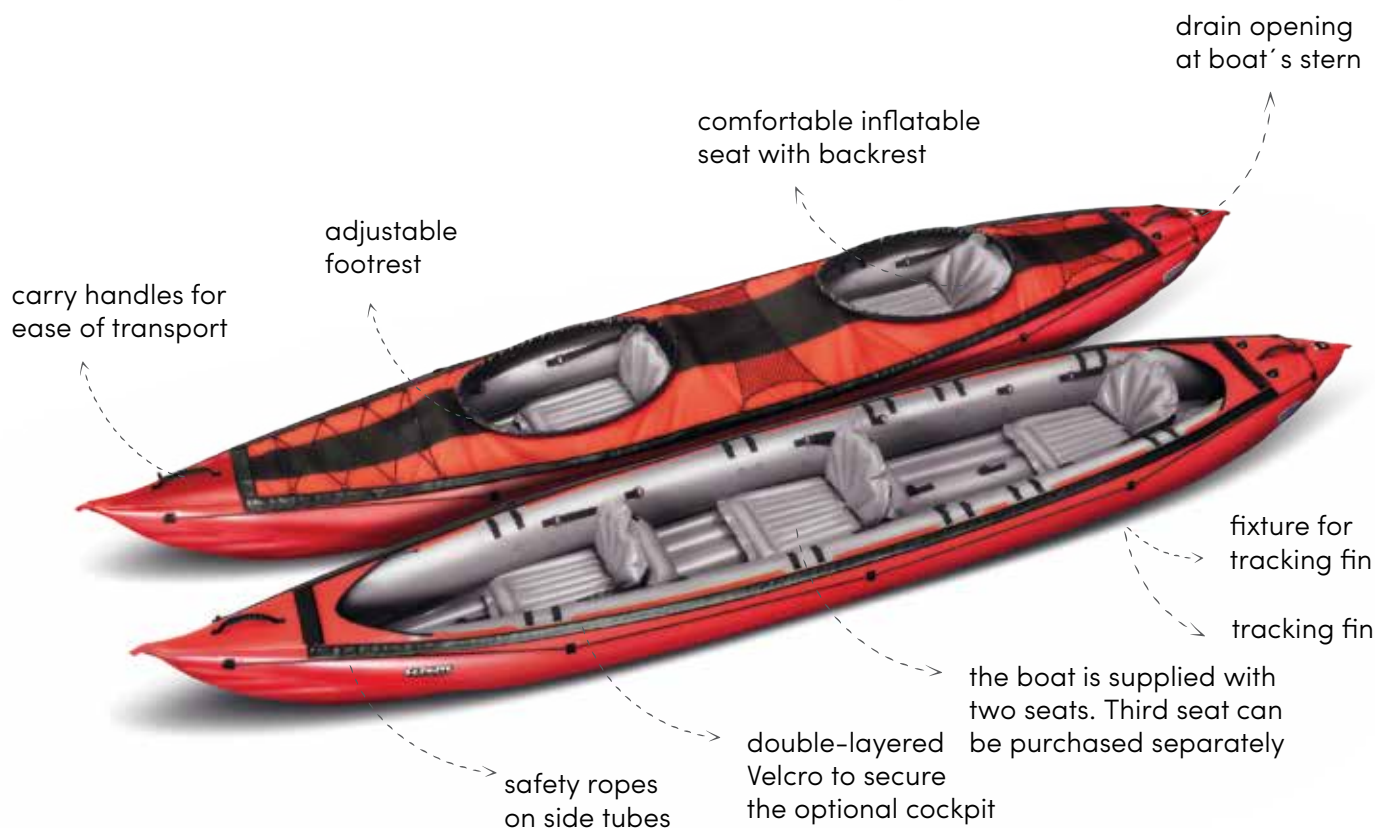

The **FRAMURA** is the fastest kayak produced by GUMOTEX. It is designed for leisure and touring and is suitable for sheltered waters, harbours, inlets and lakes as well as calm rivers up to grade 1.

The **FRAMURA** has carrying capacity in the front and rear. The kayak has a fixed deck, elastic netting and a comfortable inflatable seat: it's a feature-rich touring kayak with an optional spray skirt and rudder. A sea-kayak paddle is the ideal choice for the **FRAMURA**.

Seawave

THE ULTIMATE GUMOTEX TOURING KAYAK

Thanks to its long narrow shape, the **SEAWAVE** kayak is easy to control and very fast. It can be converted from a three-person version into a two-person or one-person kayak by moving the seats. Installation of an optional deck makes the **SEAWAVE** a great sea kayak.

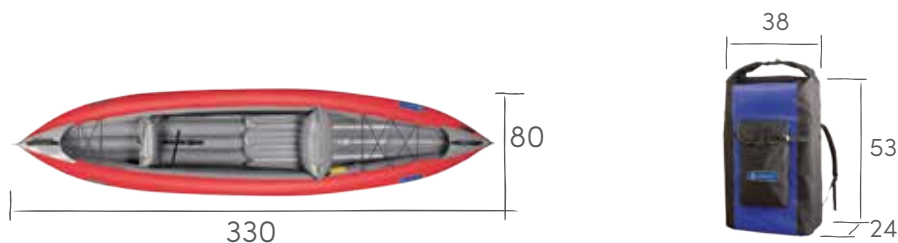

Aluminium reinforcements support the deck and stiffen the kayak. The floor features a pronounced keel for handling in the wind and better tracking.

The **SEAWAVE** is an excellent touring kayak suitable also for seakayaking in sheltered waters.

Safari

FUN KAYAK FOR RIVERS AND SEA SURFING

The **SAFARI 330** is a sports kayak with a self-bailing bottom suitable for rivers up to grade 3 white water, coastal kayaking or surfing. The new **SAFARI 330** is longer, wider and more stable than its precursor. It is spacious enough

to fit well-built kayakers and thanks to significantly improved stability, it's also suitable for less experienced paddlers. The stern and bow can accommodate dry bags with your personal gear. Elastic ropes secure the bags in place.

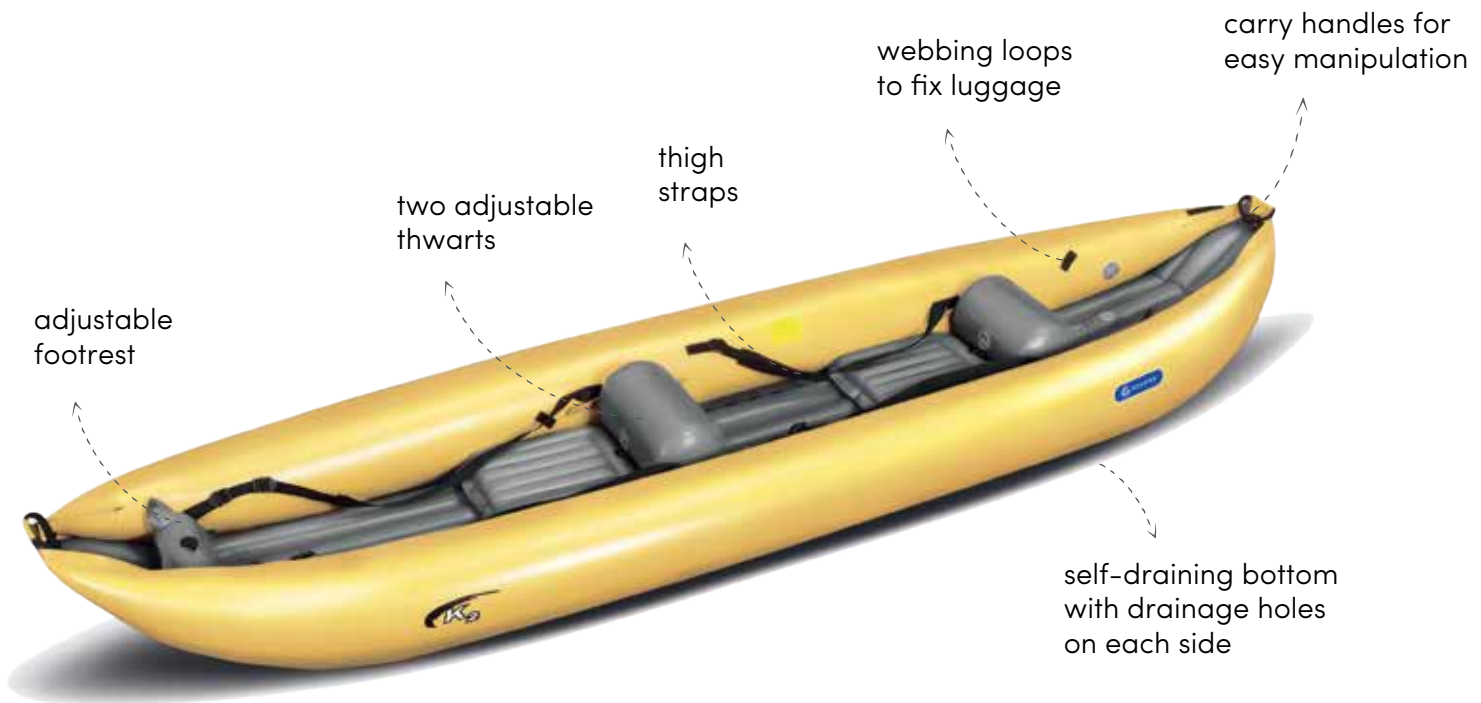

K₂

K2

DURABLE WHITE WATER KAYAKS

The **K2** is an inflatable kayak with a self-bailing floor designed specifically for white water. The kayak is very stable and forgiving inspiring confidence in novice kayakers, even on more technical runs.

The **K2** offers ample seating space and an inflatable seat(s) for comfort plus thigh straps for better control of the kayak in rapids.

AN IDEAL PARTNER FOR LONG JOURNEYS

Inflatable canoes are safe, easy to use and easily packable. They excel in their speed and agility, and also have plenty of storage space. Inflatable canoes are intended primarily for overnight trips and exploring waters with a lower degree of difficulty.

RubyXL

page 38

Baraka

page 42

Palava

page 40

Scout

page 44

RubyXL

RECREATIONAL BOAT WITH OPTIONAL MOTOR ATTACHMENT

The new, larger **RUBY XL** is 17cm wider than the original version while maintaining excellent handling performance. It can be used with oars, with paddles as a canoe, or with a motor. The fastening of the transom has also been improved: it's much more robust and can be fitted with a motor not exceeding 5 hp or 3.7 kW.

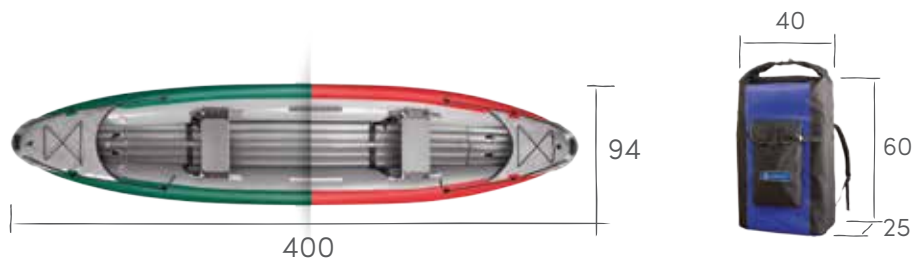

The **RUBY XL** is suitable for recreational coastal use, or just trips on lakes and quieter watercourses. With canoe paddles (i.e. without a motor or oars), this boat can be used for river cruising up to the grade 2.

(the motor used must have a short shaft and a maximum weight of 28 kg)

Palava

EVERGREEN OF EUROPEAN RIVERS

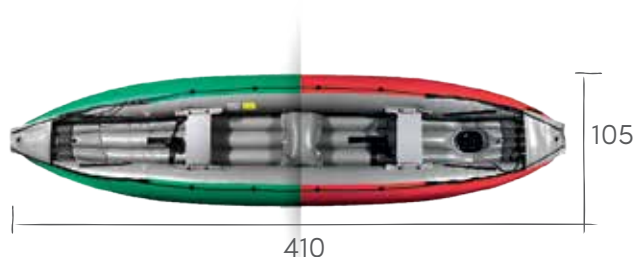

The **PALAVA** inflatable canoe is eye catching with its sporty look and excellent handling performance. Thanks to its longer hull, it offers a storage space and flexible seat positioning, providing comfort for anyone. When riding in rapids, it is possible to kneel and use the thigh straps.

The canoe is suitable for river cruising up to the grade 3 as well as for a comfortable touring on placid natural and artificial lakes.

Baraka

SPORTS CANOE WITH PLENTY OF SMART FEATURES

The **BARAKA** is a river canoe with a self-bailing floor that can handle white water up to grade 4. The boat has a rigid hull that handles well in rapids. The **BARAKA** provides its crew with many useful features and fittings and with plenty of space inside.

The boat is designed for two adults plus one child, up to a maximum load of 350 kg. The **BARAKA** is the right choice for paddlers, who are looking for a boat designed without compromises.

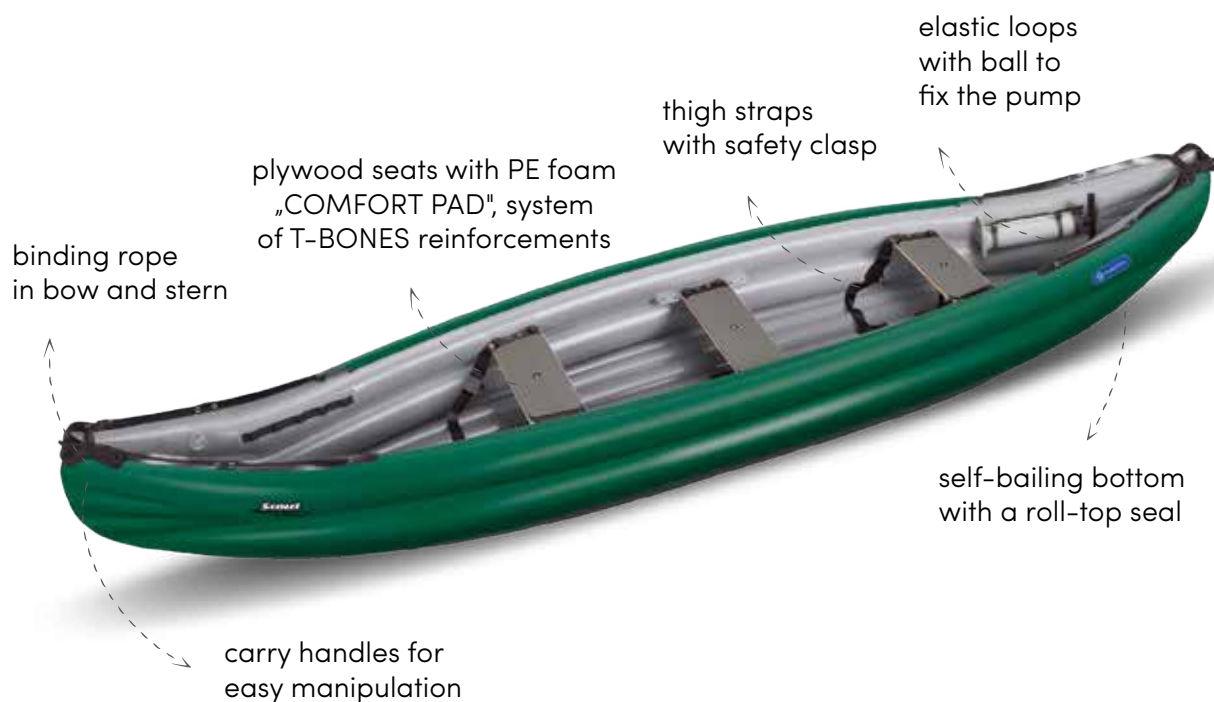

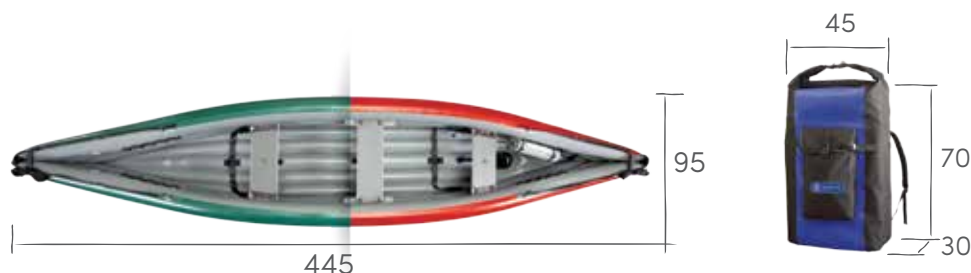

Scout

SCOUT

COMFORTABLE CANOE FOR LONG EXPEDITIONS

SCOUT is an inflatable canoe with a modern design. The boat offers plenty of features for the paddler's comfort and convenience, such as large inner space combined with huge payload and smooth handling. **SCOUT** makes an ideal boat for adventures with plenty of carrying capacity,

suitable for white water enthusiasts or for family trips. **SCOUT** brings an innovative system of T-BONES reinforcements that strengthen the boat's floor and provide great handling qualities comparable with a rigid canoe.

BOATS CAPABLE OF TACKLING THE TOUGHEST WHITEWATER RAPIDS

Inflatable boats and rafts from this category are designed for both experienced paddlers to take on rapids and for multi-day trips with the whole family or a group of friends. These boats are robust, durable and safe. We have equipped them with a self-bailing bottom and numerous safety elements. We recommend using a buoyancy aid, helmet and suitable clothing.

Ontario

Ontario

ONTARIO
450 S

TOURING RAFT

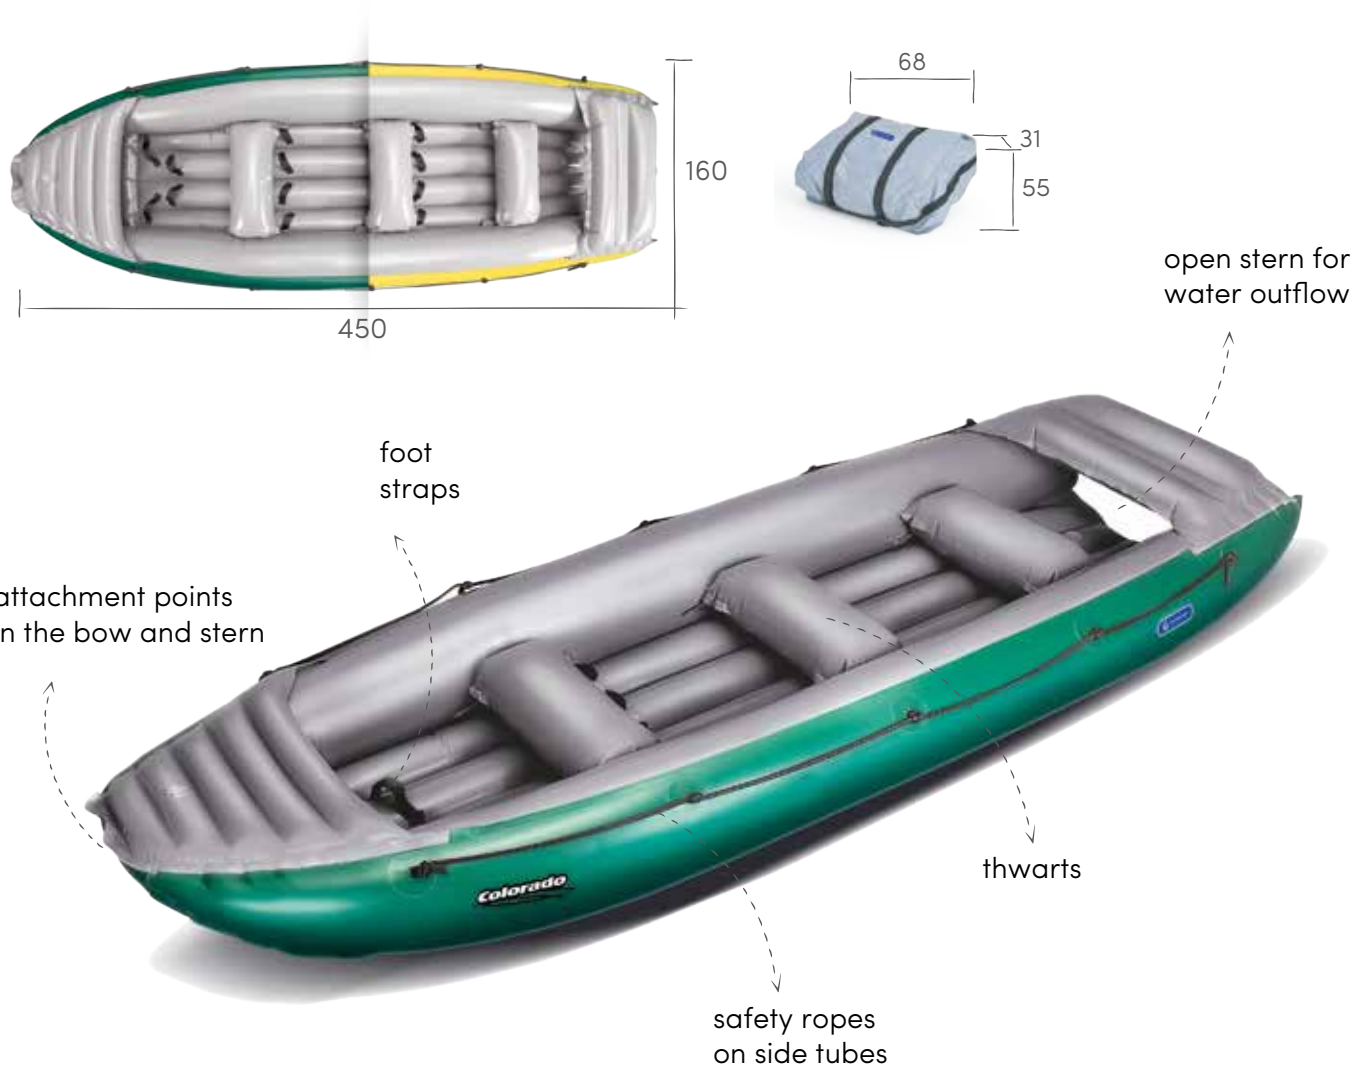

ONTARIO 450 S is a six-person boat suitable for multi-day trips on rivers with the whole family. **ONTARIO** is easy to control, fast and nimble. The **ONTARIO 450 S**

is a self-bailing boat that can handle white water up to Gr. 3. **ONTARIO 450 S** is a versatile boat suitable for everyone.

Colorado

OUR FASTEST MULTI-SEATER

The **COLORADO 450** is a multi-purpose boat. This six-person boat is great for river cruising or performance white water with experienced paddlers. The open stern provides the outflow of water in rapids.

The legendary **COLORADO** has served on many expeditions into remote places around the world and is still a very popular team racing river boat in the Czech Republic.

PULSAR
380

PULSAR
450

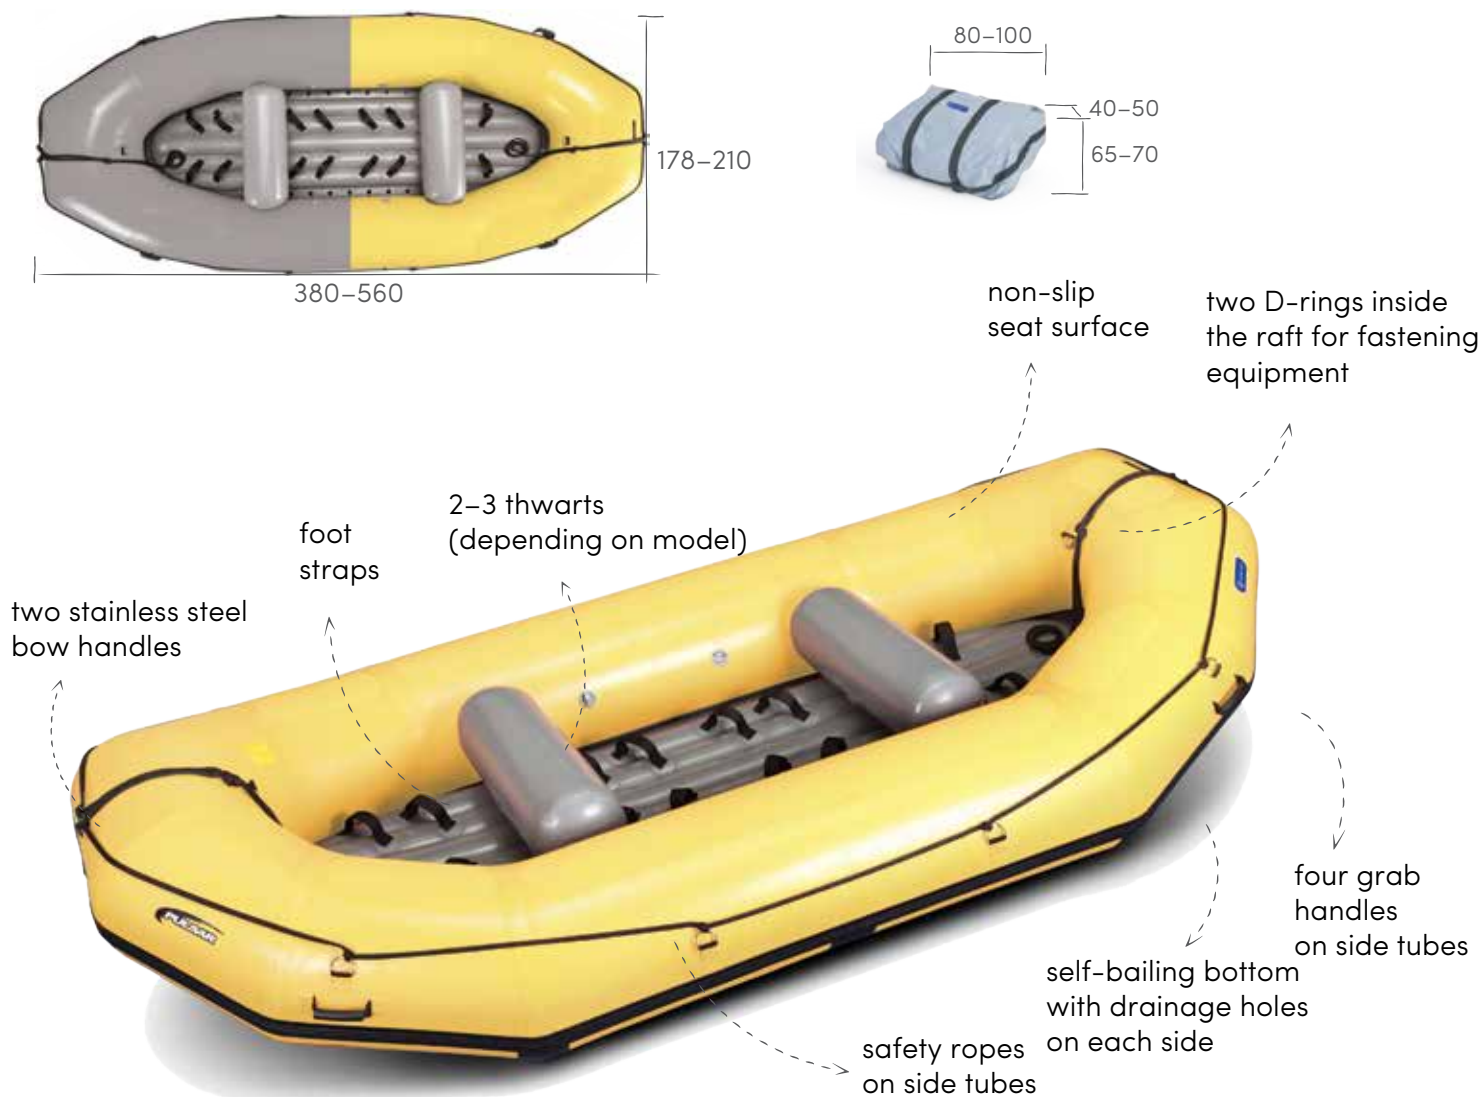

PULSAR
420

PULSAR
560

RAFT FOR THE TOUGHEST CONDITIONS

The **PULSAR** is a sought-after model by rafting operators, sports centres, water sports clubs as well as for raft racing. The fast and rigid hull combined with the self-bailing inflatable bottom provides exceptional stability and very fast draining in rapids. **PULSAR** rafts have been chosen

several times as the official race boats for the European Championships (most recently for the European Rafting Champs 2016 in Slovenia) and also the official race boat for the 2003 World Championships that took place in the Czech Republic on the Vltava River.

BEST FOR PASSIONATE FISHERMEN

The GUMOTEX inflatable fishing boats are designed for recreational and sports fishing. The boats provide a platform from which to fish. The main feature is stability – it enables standing up while casting the line. The supplied accessories include comfortable inflatable seats with backrest, rod holders and other fishing equipment. The boats pack up in the carry bag provided and is easy to carry or store.

Halibut

page 56

Alfonso

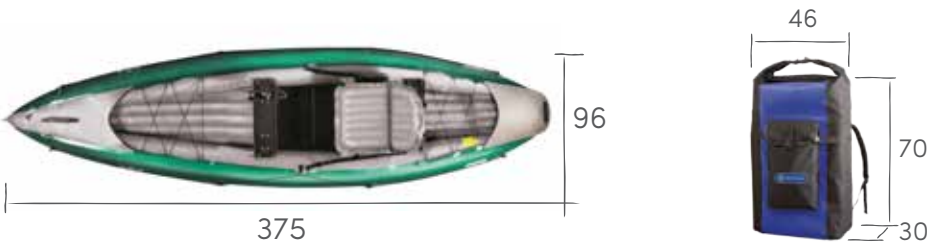

page 58

Halibut

UNIQUE FISHING KAYAK

The **HALIBUT** is an inflatable fishing kayak, offering a new dimension in the sport of angling. Thanks to its compact dimensions when packed, it is possible to enjoy kayak fishing even in remote locations. The **HALIBUT** is very stable, responsive and fast when moving on the water.

The inflatable kayak floor is fitted with a marine plywood standing platform. A raised adjustable seat makes for easy embarking and disembarking and also provides comfort while waiting for a catch.

Alfonso

COMFORT BOAT FOR FISHERMEN

The updated **ALFONSO** fishing boat is mainly distinguished by its excellent stability and plenty of space for up to 3 passengers (or 2 fishermen). It can be used with oars, with paddles as a canoe, or in combination with a motor. The fastening of the transom has also been improved, which is now much more robust and can be fitted with a motor with the maximum power up to 5 hp = 3,7 kW. A new addition – the boat has 5 bases for mounting a wide range of holders and fasteners for accessories (4 bases are placed on the side tubes because of a greater practicality, so

they do not reduce the interior space of the boat, and the 5th base is intended for the eventual positioning on the middle or rear seat). This boat is suitable for white water up to Gr. 2 using paddles alone.

(the motor used must have a short shaft and a maximum weight of 28 kg)
